**DEFENSE SCORES IN THE BEILISS TRIAL**  
KIEV, Russia, Nov. 4.—The defense scored today in the case of Mendel Beiliss who is on trial for the alleged murder of the Christian boy Yushkevitch, when Professor Kozlovskoff and other defense attorneys, who had been practicing law in the United States, were permitted to cross-examine the Russian prosecutor.

**DR. ROOSEVELT ROYALLY RECEIVED AT MONTEVIDEO**  
MONTEVIDEO, Nov. 4.—After ending 12 hours in Montevideo, Dr. Roosevelt left tonight for Buenos Aires on board the scout ship Uruguay. During his brief sojourn here, the president of the republic, Jose Figueroa Alcorta, who gave a banquet in his honor at the palace, the cabinet ministers, the diplomatic representatives and several members of the Roosevelt party attended.

**Mrs. Powell Almost Dead**  
Dry Ridge, Ky.—"I could hardly walk down the stairs," says Mrs. Lydia Powell of Dry Ridge, "before I tried Cardui. I was so poorly, I was almost dead. Now I can walk four miles and my work with much more ease. I also Cardui for my wonderful cure." Cardui is successful in benefiting sick women, because it is composed of ingredients that act specifically on the woman's constitution, relieving headache, backache, irregularity, misery and stress. Only a good medicine could now such continued increase in popularity as Cardui has, for the past 50 years. Try Cardui, the woman's tonic.

**"DURANCE VILE" TO BE PLACE OF BEAUTY**  
LOS ANGELES, Nov. 4.—"Durance vile" will be converted into a house of flowers, if Chief of Police Sebastian has his way.

The chief was busy today with plans to place palms and potted flowers in the city jail, in arches in the corridors and on the walls between the cells.

More than 100,000 women pay taxes in Michigan.

**Special Prices for Good Dentistry**  
Scientific methods, up-to-date equipment, and a large practice, enables us to do Dental work of the highest grade at the following reasonable prices:

FULL SET OF TEETH	\$7.50
Full set of natural-looking porcelain teeth on strong vulcanite plate	\$10.00
Porcelain crowns, perfect imitation of the natural tooth	\$5.00
Gold or porcelain bridge work, per tooth	\$5.00
Gold fillings, \$2.00 and up; Silver fillings	\$1.00
22 K. Triple cusp gold crowns	\$5.00

All other Dental work at prices in proportion.  
All Work Guaranteed.  
No charges for Examination and Estimate.  
You Can Pay More, but You Cannot Buy Better Dentistry.

**Dr. J. L. McDonald, Dentist**  
Phone Main 918 Rooms 5-9 Barnes Building 113 E. Pike Peak

**CANAL WONDERFUL, DECLARES GARRISON**  
Official Opening Will Take Place in Near Future.

**He Says**  
PANAMA, Nov. 4.—The American secretary of war, Lindley M. Garrison, and party sailed for New York from Colon this afternoon. Prior to his departure, the secretary gave his impressions of the canal.

"I think," he said, "it is a work of magnificent importance, magnificently done. I have seen everything susceptible of inspection, and literally it is an instance of one man succeeding another. The people of our country are justified in feeling the utmost pride in the successful accomplishment of this remarkable work."

The secretary was asked if he had anything to say as to when the canal would be opened to commerce, and replied:

"No. I think it wise not to indulge in prophecies of any sort. Machinery of a character more extensive and complicated than any heretofore used, and obstacles of a character never before encountered are factors which make it unwise for me to predict. No doubt, however, all human ingenuity can accomplish in the way of speed and successful effort is being done and that day is not far distant when prediction will no longer be necessary."

**Giving It Close Study**  
With reference to future reorganization in preparation for the operation of the canal, the secretary said:

"I have obtained the views of each of the commissioners with the exception of Lieutenant Colonel Galliard, whose illness prevented me from doing so in his case, and also the views of others whose experience would be useful. But I am not ready to indicate the matter the most careful consideration before recommending to the president what I think proper to do."

I have talked with Colonel Goethals and Governor Metcalf separately and together and am pleased to find that there is no truth in certain rumors that there is disagreement between them. I regret anyone should have indicated that anything of the kind existed."

**STRIKERS GETTING READY FOR WINTER**  
Stores Being Opened in the Calumet District by Labor Leaders

CALUMET, Mich., Nov. 4.—With no hope of a settlement of the copper strike in sight, the strikers began preparations today to carry their fight for recognition of the union through the winter.

Stores have been opened at Hancock and Red Jacket by the Western Federation of Miners and others will be started at Laurium, Ahmeek and South Range.

These stores will be stocked with necessities of life contributed by strike sympathizers and labor unions, and will be the distributing centers in their respective districts. Large quantities of clothing are expected from Butte and other metal mining regions. Three carloads of coal arrived in the South Range district today and strikers are cutting their winter supply of fuel on property of strike sympathizers near Calumet.

Leaders declare there is no suffering among the strikers. Donations of money are being received from organizations affiliated with the American Federation of Labor.

**O. W. WARD**

(Continued From Page One)  
the need of the city for competent and intelligent service.

"I have every confidence in the qualifications of Mr. Ward for the position. I am sure that his administration of this important public office will bring credit, not only to himself, but to the Democratic party with which he has been so long and actively identified."

**"H. H. SELDMORRIDGE"**  
**Business Ability and Personality.**  
"My knowledge of Mr. Ward's character, business ability and fine personality was the controlling factor in my selection of him for the Colorado Springs postmastership," said Mr. Seldmorrige. "Of course, the political element figured to some extent. I sincerely regret that I must disappoint so many warm friends through this selection, but it was a question which I believed should not be settled through personal feeling rather than qualifications."

The congressman was governed to some extent in his selection by a speech delivered by D. C. Roper, first assistant postmaster general, before the National Association of Postmasters. Roper declared "efficiency" to be the keynote of the present administration, and pointed out the qualifications which should be found in all postmasters.

Mr. Seldmorrige in making his choice attempted to select a man who possessed all of the requisites named by the official.

**MRS. STEVENS REELECTED NATIONAL W. C. T. U. HEAD**

ARMORY PARK, N. J., Nov. 4.—Election of officers held at the attention of the National Woman's Temperance Union in convention here today. Mrs. Lillian Stevens of Portland, Me., was reelected president. She has held the office since 1908. She was appointed as vice president at large, Miss Anna A. Gordon of Evanston, Ill. Other national officers were reelected as follows: Mrs. Frances P. Parks, Evanston, Ill., corresponding secretary; Mrs. Elizabeth Preston Anderson, Jantetown, N. Y., recording secretary; Mrs. Elizabeth P. Hutchinson, Evanston, Ill., treasurer.

Mrs. Sarah H. Hore, Lincoln, Va., was reappointed assistant recording secretary.

**THOMAS AND PERSONS**

(Continued From Page One.)  
subpoena witnesses and take their testimony under oath.

"It was found in Wales that the vote of the umpire was rarely, if ever, needed. After the men and the operators had thrashed things out, they almost always reached an agreement. The same thing, I believe, would be found here. There should be provision, of course, for the enforcement of the decision reached by the arbitrator."

"I know that proposals have been made for a general mediation board. That is doubtless necessary. It might be hard to get such a general act as I have outlined, applying to the conditions actually existing in the coal fields, should meet with little opposition."

**Proposes Special Session.**  
W. M. Persons, the other Progressive member of the El Paso delegation in the lower house, is also in favor of a special session, provided the governor has assurances that a majority of the members would be willing to enact a law that would cure present conditions.

"I understand it is costing \$5,000 per day to maintain the militia alone," he said. "The cost to the people, in the increased price of coal, is, of course, very much greater than this. If the members of the legislature would agree to devote their best energies to getting a bill through and would agree beforehand to enact an arbitration bill, it ought to be possible, in a week's session, at a cost of not more than \$15,000 to end the present strife. The only cost to the state of a special session would be the mileage of members and the salaries of such stenographers, clerks and other employees as might be necessary for the short session."

am strongly of the opinion that the governor ought to act, provided, of course, he can get assurances from a majority of the members that they will enact an arbitration measure."

**11-YEAR-OLD BOY HELD ON A MURDER CHARGE**

DECATUR, Ill., Nov. 4.—Clarence Fuller of Mattoon, 11 years old, was arrested today on a charge of attempted murder following the shooting of a companion several days ago.

**A SOUR STOMACH, GAS, INDIGESTION**  
"Pape's Diapepsin" ends all Stomach distress in five minutes Time it!

If what you just ate is settling on your stomach or lies like a lump of lead, refusing to digest, or if you have a feeling of distress, heartburn, fullness, nausea, bad taste in mouth and stomach, headache, nervous, keel blessed relief in five minutes!

Ask your pharmacist for Pape's Diapepsin, the formula, plainly printed on these fifty-cent cases of Pape's Diapepsin, then you will understand what scientific troubles of all kinds arise from, and why they relieve, sour stomach, indigestion, gas, heartburn, nervousness, dizziness, or any stomach misery.

Get some now, this minute, and rid yourself of stomach trouble and indigestion in five minutes.

**STRIKERS GETTING READY FOR WINTER**  
Stores Being Opened in the Calumet District by Labor Leaders

CALUMET, Mich., Nov. 4.—With no hope of a settlement of the copper strike in sight, the strikers began preparations today to carry their fight for recognition of the union through the winter.

Stores have been opened at Hancock and Red Jacket by the Western Federation of Miners and others will be started at Laurium, Ahmeek and South Range.

These stores will be stocked with necessities of life contributed by strike sympathizers and labor unions, and will be the distributing centers in their respective districts. Large quantities of clothing are expected from Butte and other metal mining regions. Three carloads of coal arrived in the South Range district today and strikers are cutting their winter supply of fuel on property of strike sympathizers near Calumet.

Leaders declare there is no suffering among the strikers. Donations of money are being received from organizations affiliated with the American Federation of Labor.

**Few Mines Working.**

The Calumet and Hecla is the only mining company which has brought its output to normal through the employment of imported men, but other companies are adopting a similar course to break the strike. Present production is about one fifth of normal for the district.

The injunction against picketing by strikers will remain in force at least until November 20, the date set for the oral arguments by attorneys for the operators and for the Western Federation of Miners before the state supreme court. The answer in mandamus proceedings was filed at Lansing today.

Circuit Judge O'Brien overruled today a motion to continue the case of six deputy sheriffs charged with the murder of two strikers in the South Range district in August. The trial will open November 25.

**GOES TO SLEEP AT WHEEL OF AUTO; KILLS HIS SON**

REDLANDS, Cal., Nov. 4.—Rosa Best testified at an inquest today that he fell asleep at the steering wheel of his automobile last night, and thus was responsible for the death of his son, who was killed in the wreck that followed.

**EAT LESS MEAT IF BACK HURTS**

Landing meat is really essential, produces kidney trouble in some form or other, says a known authority, because the animal is in most cases the kidney, the source of all sorts of distress, particularly backache and migraines, the kidney region, rheumatic twinges, severe headache, acid stomach, constipation, torpid liver, sleeplessness, nervous and urinary irritation.

The moment your back hurts or kidneys are in trouble, or if bladder bothers you, eat but four ounces of meat from a pound of meat, taken in tablespoonfuls of a glass of water before breakfast and at bed and your kidneys will be set free. The famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush out the kidneys and stimulate them to normal activity; also to neutralize the acids in the urine so it no longer irritates, thus ending bladder disorders.

Jad Salts cannot injure anyone, makes a delicious effervescent lithia-water drink which millions of men and women take now and then to keep the kidneys and bladder organs clean, thus avoiding serious kidney disease.

**TAKE A GLASS OF SALTS TO FLUSH KIDNEYS IF BLADDER BOTHERS YOU**

Landing meat is really essential, produces kidney trouble in some form or other, says a known authority, because the animal is in most cases the kidney, the source of all sorts of distress, particularly backache and migraines, the kidney region, rheumatic twinges, severe headache, acid stomach, constipation, torpid liver, sleeplessness, nervous and urinary irritation.

**HALT OPERATIONS TO INOCULATE TROOPS**  
Fear Typhoid Epidemic in Southern Colorado Coal Fields

TRINIDAD, Nov. 4.—Military operations in the strike zone of the southern Colorado fields were practically halted today, pending the inoculation of the members of the Colorado National guard against typhoid fever.

The work of inoculating the men, which was started this afternoon, and will be continued until all have been treated. The compulsory order by Adjutant General Chase followed a report that several cases had developed at Ludlow and vicinity.

No formal steps of military drill at Ludlow were taken today. Five or six guns were turned over to the soldiers by John R. Lawson.

Troop B of cavalry left this afternoon to receive a detail of militiamen at Delagua and Troop D at Aguilar was returned to Walsenburg. Later, instructions to order the return of Troop D to Aguilar were issued when J. W. Shiple, president of the Southern Colorado Fuel company informed General Chase that the employees at the Empire and Southwestern mines were alarmed and determined to desert their posts until afforded military protection.

The discharge of a Colorado and Southern train crew for refusing recently to take out of Trinidad a special train bearing mine guards, formed the topic of a long conference today between C. E. Seehorn, representing the R. of L. E. and B., and C. & S. officials here today. No formal statement was issued by either side, but Mr. Seehorn announced that the matter probably would be adjusted in a few days and that the amicable relations between the railroad and the men were in no manner threatened.

**ARRANGEMENTS MADE FOR WHITE HOUSE WEDDING**  
Miss Margaret Wilson Will Be Maid of Honor; Other Sister One of Bridesmaids

WASHINGTON, Nov. 4.—Announcement was made at the White house tonight that Miss Margaret Wilson, eldest daughter of the president, will be maid of honor at the wedding of her sister, Miss Jessie Woodrow Wilson, to Francis B. Sayre, on November 25 at the White house. The bridesmaids will be Miss Eleanor Randolph Wilson, the youngest daughter of the president; Miss Mary G. White of Baltimore, a college friend of Miss Jessie Wilson; Miss Adeline Mitchell Scott, the daughter of Professor William B. Scott of Princeton, and Miss Margaret Brown, a daughter of Mrs. Wilson's cousin, Colonel E. T. Brown of Atlanta, Ga.

Dr. Wilfred T. Grandy, with whom Mr. Sayre was associated as a mission worker in Labrador, is to be the best man. The groom will be Benjamin D. Burton of New York city, who graduated in 1912 from Williams college, Dr. Scoville Clark of Salem, Mass., with whom Mr. Sayre did mission work in northern Newfoundland; Dr. Gilbert Horax of Montclair, N. J., a classmate of Mr. Sayre at Williams college in 1909 and now at the Johns Hopkins Medical school; and Charles Evans Hughes, Jr., a son of Justice Hughes of the supreme court, and a classmate of Mr. Sayre at Harvard law school. Mr. Sayre, of the First Presbyterian church at Princeton which the Wilson family has attended for years, will perform the ceremony.

**PREACHER TO SELL PAPERS ON CHICAGO STREETS**

CHICAGO, Nov. 4.—Rather than continue to accept \$50 a month from a benevolent society for pensioned priests, the Rev. Michael C. Pylycz, for 30 years pastor of the St. Joseph Polish Catholic church, is going to sell newspapers on Chicago's streets.

Yesterday he came here from Des Plaines, Ill., where he has been in retirement since last May and decided to put up a news stand at State and Madison streets. This inscription will hang over the stand:

"This is Father Pylycz, who for 30 years served his people in St. Joseph parish at Armistice Avenue and Forty-eighth street and in South Chicago. The retired Polish father declared it is no just to the benevolent society to take a money when he is able to work."

**BE PRETTY! TURN GRAY HAIR DARK**

TRY GRANDMOTHER'S OLD FAVORITE RECIPE OF SAGE TEA AND SULPHUR

Almost everyone knows that Sage Tea and Sulphur, properly compounded, brings back the natural color and lustre to the hair when faded, streaked or gray, also cures dandruff, itching scalp and stops falling hair. Years ago the only way to get this mixture was to make it at home, which is messy and troublesome. Nowadays, by acquiring any drug store for "Woolly's Sage and Sulphur Hair Remedy," you will get a large bottle of this famous old recipe for about 50 cents.

Don't stay gray! Try it! No one can possibly tell that you darkened your hair as it does it so naturally and evenly. You dampen a sponge or soft brush with it and draw this through your hair, making one small strand at a time, by morning the gray hair disappears and after another application of two, your hair becomes beautifully dark, thick and glossy.

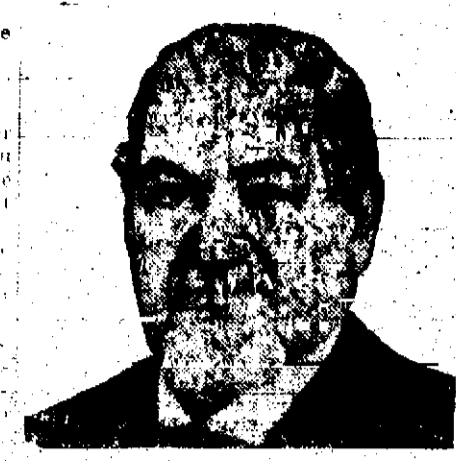

**A Doctor's First Question Is ?**  
"How Are Your Bowels?" A Simple Remedy That Guarantees Good Bowel Action

There is the origin of the common ailment of 400 and almost invariably you will find that constipation was the cause. It is just as to be expected that a minute's fermented food can be much more noxious to the body than without straining the blood and affecting the nerves and muscles. It collects the entire body.

The results are likely to be: indigestion, headache, nervousness, with accompanying indigestion and sleeplessness. There is not one thing to do and that is to induce the bowels to do and when nature seems unable to do it outside of its power. You will find the post of all outside and inside remedies that many thousands and now using for this very purpose called "Dr. Caldwell's Syrup Pepsin." Many hundreds of letters are received by Dr. Caldwell telling of the good results obtained, and among the earliest of these is one from Lieut. G. W. Vaughan, of 622 W. North St., Decatur, Ill. He is 32 and has had a bad liver and stomach since he came out of the army. He says he tried out everything, but never succeeded in getting permanent relief until he took Dr. Caldwell's Syrup Pepsin. He is never without a bottle in the house, and he is never without good health.

It has untold advantages over pills, salts and the various coarse cathartics and purgatives, for while these do but temporary good, Syrup Pepsin cures permanently. The effect of its action is to train the stomach and bowel muscles to do their work naturally again, and in a short time all forms of modern constipation are with it. It can be bought without inconvenience at any nearby drug store for fifty cents and one dollar a bottle, the latter size being regularly bought by those who already know its value. Results are always guaranteed or money will be refunded.

Families wishing to try a free sample bottle can obtain it postpaid by addressing Dr. W. H. Caldwell, 419 Washington St., Mountclem, Ill. A postal card with your name and address on it will do.

LIEUT. G. W. VAUGHAN

**EUROPE BACKING U. S. IN MEXICAN EMBROGLIO NOW**

LONDON, Nov. 4.—Wednesday. The London morning papers in editorial on the Mexican situation, express the belief that, although the report of the nature of the Washington communication might be inaccurate, President Wilson ultimately would be driven to intervention.

The Morning Post says:

"It is more important for the United States to secure good government in Mexico than in any of the smaller states, and if this end can only be achieved by intervention, her people will not be daunted by the cost."

The Express contends that delay only increases the difficulties, and that the United States must either act and rescue Mexico from chaos or the Monroe doctrine must be revised.

The Times thinks any attempt to break down Huerta's influence without intervention would result in increasing his pretension to pose as a patriot and the champion of equal rights. It adds:

"If President Wilson can secure a firm and honest government in Mexico without a preliminary season of bloodshed and chaos, he will perform a very remarkable diplomatic feat. But the damage to American interests by continued disorders is so great that we cannot understand his attempting it."

The Chronicle says:

"Whether or not a formal ultimatum has been sent, the effect is the same. Huerta must surrender or the United States must undertake a Mexican war, and it is quite unlikely that Huerta will yield. The European nations, although they have great interests there, cannot consistently continue to go to war with Mexico, but are ready to give their sympathy and passive support to the United States."

The Chronicle expresses the opinion that the Panama canal has been the deciding factor in determining the United States to shoulder such an enormous and perilous task."

**HUERTA DOES NOT REPLY**

(Continued From Page One.)  
to discuss the Washington demands with his ministers.

**Exact Status of Case Unknown.**  
WASHINGTON, Nov. 4.—The Mexican situation was the subject of widespread comment in Washington today, but the day's developments in official quarters added little of a definite or tangible nature concerning the exact status of affairs. The reports from Mexico City that a new and somewhat summary move had been made by the United States toward the extradition of General Huerta, brought no response from the state department or other official sources. Secretary Bryan's statement from San Antonio, Tex., that he had been presented with a communication had been presented. Whether some other communication had been presented, Mr. Bryan positively declined to state, maintaining that the government should be free to shape its course of action on an affair without defining each step through the press.

President Wilson left early to catch his train for New Jersey, returning late this evening. Secretary McPherson remained at the state department, where there were no signs of unusual activity, beyond the receipt of inquiries concerning the reports from Mexico City of another attempt to break the nature of intervention.

It is well informed quarters it was admitted that negotiations have been proceeding in pursuance of President Wilson's determination to secure the extradition of Huerta as a factor in Mexico. That this involved delivery to Mexico of a copy of the communication from the state department or other official source, Secretary Bryan said, was a communication from the state department, but he declined to say whether it was a communication from the state department or other official source.

### Nearly Two Billion Gallons in Storage

A October report of R. H. McQuinn, superintendent of the water treatment shows that the city has 1,900,000 gallons of water in storage. According to the report, the storage in mountains shows a decrease of 37,000 gallons. The city's streams are saving 5,000,000 gallons daily, a decrease of 1,000,000 gallons over that of month.

A report shows Colorado Springs 146,000,000 gallons of water stored in the city. The city's streams are saving 5,000,000 gallons daily, a decrease of 1,000,000 gallons over that of month.

### INGS TO BE INCLUDED IN NEW FINANCIAL BOOK

The first time in its history, the city's financial book will be included in the annual report of the city. The book will be published by the city's financial department, under the title, "Financial Statement of the City of Colorado Springs." It will contain a detailed statement of the city's financial condition, including a list of all the city's assets and liabilities, and a statement of the city's income and expenses for the year.

### Id Lady's Sage Advice

xxville Tenn.—Mrs. Mamie Towse, W. Main Street, this city, says: "I have seen me, before I began to Cardul, you would not think the same person. Six doctors to do me good, and my friends at I would die. I could hardly get to bed or walk a step. At last I had advised me to take Cardul. I can go most anywhere. All women need Cardul as a gentle, strengthening tonic, especially adapted to the delicate system. It is a reliable, safe remedy, successfully used for 10 years. You ought to try it. Adv.

## BLOOD PRESSURE LOWER AT HIGH ALTITUDE ACCORDING TO TESTS MADE BY SCIENTIST

Results of Experiments on H. H. Robinson, Who Lives on Peak, Just Announced

Results of several months' experiments on Pike's Peak and in Colorado Springs are embodied in an article by Dr. E. C. Schneider of the biology department of Colorado College entitled "Physiological Observations Following Descent from Pike's Peak to Colorado Springs," which appears in the October number of the *Annals of the Association of American Physiologists*.

HOWARD H. ROBINSON.

Summit house on the peak, was the subject used by Dr. Schneider in his tests; both on the mountain and in the city. The experiments were made during the summer of 1912 and last winter.

### HOPES COLORADO IS IN BIG EXPOSITION

Spencer Penrose Says State Cannot Afford to Miss Panama-Pacific Show

Declaring that Colorado cannot afford to absent itself from the list of states preparing for representation at the Panama-Pacific exposition, Spencer Penrose of this city is quoted in an interview by a San Francisco paper. Mr. Penrose also believes that the opening of the Panama canal will usher in a new era in the trade history of the world. He was present at the recent dedication of the site for the Wisconsin state building in which Governor McGovern and commissioners of Wisconsin and Governor Johnson of California and the exposition management took part, and says that he is greatly impressed with the importance of the coming exposition.

Concerning the exposition site he is enthusiastically declaring that he has never seen a more wonderful piece of ground than the broad 600-acre tract which for more than two miles faces San Francisco bay at the very entrance of the Golden Gate. The stretch for the most part is as level as a billiard table and is wonderfully endowed with natural settings of mountains, cliffs and blue waters.

According to Mr. Penrose, the exposition will be the greatest ever held. He said in part:

This achievement and subsequent commemorative celebration is San Francisco will mark a new era in the world's history. The center of commercial gravity will be shifted westward. The world's industry and commerce will seek new markets. The old channels of trade, fixed by the impact of centuries, will be broken up and new ones created. The course of migration in all parts of the world will be affected. The east and west will be drawn closer together. International relationships will be settled by a closed bond of union. The changes that will result from the use of the canal, marking a new era in the world's history, such as the states in the Union and the nations of the world are preparing upon the shores of the magnificent San Francisco harbor.

The fact that the people of California have contributed over \$20,000,000 to this enterprise is sufficient evidence of the individual energy of those who are promoting it and the fact that there will be expended upon the grounds not less than \$1,000,000,000 is the scope and magnitude of this great event.

### Many Changes Observed

Changes in blood pressure, pulse rate and respiration following a long residence on the peak from the subject of the tests. At the conclusion of his experiments Dr. Schneider found that the increase in blood pressure, pulse rate and respiration was decreasing after a long residence at an extremely high altitude. Contrary to general belief, blood pressure on Pike's Peak is lower than at a lesser altitude making the pressure on the heart less. For several days after his descent Robinson's pulse rate was lower than his normal at this altitude due to the change which takes place to adapt the system to a diminished supply of oxygen at a higher altitude.

Dr. Schneider found the lung ventilation is greatly increased on the peak that a greater supply of oxygen may be furnished the body. The increased ventilation was off slowly upon the subject's return to Colorado Springs. The belief that the chest is enlarged by continuous residence at high altitudes was dispelled by Dr. Schneider who found Mr. Robinson's chest measurement below the normal if anything.

The article is of great value because it deals with changes which take place upon descent from a higher to a lower altitude after a period of several months a subject which has never before been treated.

### RECORDS SHOW COLDEST OCTOBER DAY ON 28TH

Mercury Drops to 12 Above, but Mean Temperature for Month is Highest in 35 Years

The mercury dropped lower during the month of October just past than in any previous October since the records have been kept in Colorado Springs. The lowest mark reached last month was 12 degrees above zero registered Tuesday, October 28. The nearest approach to this temperature was 16 degrees, registered in October, 1888. In spite of the fact that last month contained this record for cold, the mean temperature for the month, 46.2 degrees, was 7.9 degrees higher than the mean temperature for the month of October for the last 35 years which is 38.3 degrees. The complete story of the weather last month is told in the following table:

Mean bar pressure inches	24.16
Max. bar pressure in inch Oct 9	24.37
Min. bar pres. inches Oct 9	23.72
Mean temperature	46.2
Mean temp. this month in 35 yrs	38.3
Difference	7.9
Highest temperature Oct 3	72
Lowest temperature Oct 28	12
Wettest daily range Oct 28	24
Mean relative humidity at noon	35
Mean dew point	38
Total wind movement miles	4,788
Max. vel. per hour miles	6.4
Per cent of possible sunshine	65
Total precipitation in inches	5.3
Mean precip. this month in 35 yrs	3.8
Difference	1.5
Max. precipitation in 24 hours	1.8
No days clear	14
No days partly cloudy	12

### BOARD WILL REPORT ON BUDGET TONIGHT

At the regular meeting of the school board tonight the audit and finance committee will report on the budget for the current school year. If the board accepts the report the annual tax will be levied among the property holders of district No. 11.

### "GETS-IT," for Corns Surely Gets Them!

It's the Corn Cure on a New Plan. Gets Every Corn Quick and Sure.

"If you're like me, and have tried nearly everything to get rid of corns and have still got them. Just try the new, sure, quick, easy, painless way—"

Talk About Your Corn-Getters, "GETS-IT" Surely Is the Real Thing!

### RUB BACKACHE AWAY WITH OLD TIME OIL—TRY THIS!

Rub your right out with a small trial bottle of "St. Jacobs Oil"

When your back is sore and lame or lumbago, sciatica or rheumatism has you stiffened up don't suffer. Get a small trial bottle of old time St. Jacobs Oil at any drug store. Pour a little in your hand and rub it right into your back, and in the time you can get it, the soreness and lameness is gone.

Don't stay cramped! This soothing penetrating oil needs to be used only once. It takes the ache and pain right out and ends the misery. It is magical yet absolutely harmless and doesn't burn or discolor the skin. Nothing else stops lumbago, sciatica and lame back misery so fast and surely. It never disappoints. Adv.

### ONLY 2 DAYS MORE TO COMPLETE FUND

Friends of Y. W. C. A. Urged to Contribute to \$6,000 Expense Fund

Though the smallest amount was raised yesterday for the \$6,000 expense fund being secured by the Young Women's Christian association, enthusiasm is in no wise abated for it is a self-evident fact that needs no flaunting that the multitude of friends the association has, intend to see it through this campaign with colorizing and its expense fund snugly entered in a bank book.

As it seems impossible to see all of the friends of the association personally, Mrs. Franklin E. Brooke, chairman of the finance committee, has decided to ask those who wish to contribute to the fund, but who have not been solicited, to telephone to her at either Main 231 or 944, when she will arrange to call or send for their donation or if they prefer, to clip the following pledge card and send it in earning thereby the undying gratitude of a busy committee.

### Pledge

To the Young Women's Christian association of Colorado Springs, and supplementary work.

I agree to pay the sum of \$  
Name  
Address  
Date of pledge  
Payable to Mrs. Irving Howbert, Treasurer, Y. W. C. A.  
The pledge is payable any time before October 1, 1914.  
Interest: Interest was lent to the gathering for tea yesterday afternoon by the presence of two Colorado college girls who are actively engaged in the association work, and who spoke at the different phases of the work. Miss Anna Carson spoke first dwelling upon the relation of the Young Women's Christian association of the college to the new city each year. There are 20 girls in Colorado college and 175 of these belong to the college Y. W. C. A. When the new girls name is entered upon the college books, even before the opening of the semester, they receive a letter of welcome from the Y. W. C. A. When she arrives in the Springs, she is met at the train by one or more Y. W. C. A. girls and when she reaches the registrar's room her lot is still a cheerful one for the Y. W. C. A. girls are glad to have a new member of women in her registration dean. On the new girl's first Sunday morning at the college her room is brightened with flowers the gift of the Y. W. C. A. and from that on throughout her college course the Y. W. C. A. is the most unostentatiously helpful medium of her college life.

College Association Active.  
Miss Lucille Wakefield spoke of the college associations work outside the institution. In Papeton Pike, Roswell and at Hillside the girls help with the Sunday evening service. They visit the Day Nursery as often as possible and introduce new games and other form of entertainment into the life of the children there. Each year each college girl spends a doll for the children of the Sprague, and the proceeds are given to the children of the Sprague. There are 20 girls in Colorado college and 175 of these belong to the college Y. W. C. A. When the new girls name is entered upon the college books, even before the opening of the semester, they receive a letter of welcome from the Y. W. C. A. When she arrives in the Springs, she is met at the train by one or more Y. W. C. A. girls and when she reaches the registrar's room her lot is still a cheerful one for the Y. W. C. A. girls are glad to have a new member of women in her registration dean. On the new girl's first Sunday morning at the college her room is brightened with flowers the gift of the Y. W. C. A. and from that on throughout her college course the Y. W. C. A. is the most unostentatiously helpful medium of her college life.

Spencer Penrose Says State Cannot Afford to Miss Panama-Pacific Show  
Declaring that Colorado cannot afford to absent itself from the list of states preparing for representation at the Panama-Pacific exposition, Spencer Penrose of this city is quoted in an interview by a San Francisco paper. Mr. Penrose also believes that the opening of the Panama canal will usher in a new era in the trade history of the world. He was present at the recent dedication of the site for the Wisconsin state building in which Governor McGovern and commissioners of Wisconsin and Governor Johnson of California and the exposition management took part, and says that he is greatly impressed with the importance of the coming exposition.

### SPRINGS WIDELY REPRESENTED.

It will be interesting to Springs people to know that the list of girls to be found at over the world, playing an important part in the association work. Among them are Miss Edith M. Dadd, national secretary for work in Indian schools. Mrs. Lester McLean Jr. former student secretary in Colorado. Miss Mary McGreevy, general secretary of the association in Buffalo. Miss Ruth Ragan in the office of the National Association in Tokyo. Miss Grace Fuller, assistant secretary in El Paso. Miss Lillian E. in El Paso. Miss Grace Wilson, training center work in Denver. Miss Margaret Mack, city secretary. Miss Cal. Miss Maxine Scott, assistant dean of the National Training School for Secretaries in New York. Miss Catherine Gregg, membership secretary of the local association.  
Miss Eliza Rhees, Butler sister of President Nicholas, of the Federal Columbia University. National Secretary for High school work who is now working in the county high schools of Kansas will arrive in the Springs this month to visit Mr. William Frederick Slocum to advise with Miss Holmes, general secretary of the local organization on high school work.  
German foresters are experimenting with Douglas fir from the United States trying to find a variety which will combine the fast growing quality of the Pacific coast fir and the hardiness of the Douglas fir mountain form.

### DR. SLOCUM CHAIRMAN OF MERGED CHARITY BODIES

Central Council of Social Agencies Elects Officers Executive Committee Starts Investigation

Members of the Central Council of Social agencies of this city met yesterday afternoon in the Chamber of Commerce rooms to organize the work of the year and elect officers. At the close of the report by the nominating committee the following officers were elected for the coming year: Dr. William F. Slocum, chairman, Arthur N. Taft vice chairman, F. M. Taylor, secretary, E. P. Shove, treasurer, Mrs. George A. Boyd, Mrs. William F. Slocum, Miss E. T. Brinley and Mrs. Lida M. Toussaint, members of the executive committee. Officers are members of the executive committee.

The following were elected members at large of the association because they do not represent any of the charitable organizations comprising the central association: Dr. W. F. Slocum, Dr. W. B. Parsons, E. P. Shove, Mrs. George A. Boyd, Mrs. Toussaint and F. M. Taylor.

The executive committee will meet as soon as practical and at the meeting yesterday this committee was given several problems to work out or investigate and then report their considerations at the next regular meeting of the organization.

### To Study Conditions of Poor.

The committee will study the condition of the poor of the city in regard to their income and expenditures and learn exactly the extent of poverty in Colorado Springs. In this way the central council hopes to get at the exact amount of philanthropy necessary in the city, and distribute the relief work among the individual organizations.

Another task allotted to the committee was to find out whether or not some of the private philanthropy of the city should not be helped out by county or city funds. They are also to take up the matter of a single budget for all charity work in the city. This latter plan would, "if put into effect that the central organization would make up and collect the budget for philanthropies each year and all supporters of such movements would thus be solicited but once each year. This plan is now used in Cleveland and is proving successful.

The central Council of Social agencies is composed of two representatives from each of the following established charitable organizations: Associated Charities, Visiting Nurse association, Y. W. C. A., Y. M. C. A., Beth-El hospital, St. Francis hospital, Sunnyvale, St. Joseph's hospital, the Parent and Teachers association. The council will meet regularly the first Tuesday of each month and these meetings will always be open to the public.

### Between Women's Health or Suffering

The main reason why so many women suffer greatly at times is because of a run-down condition. Debility, poor circulation show in headaches, languor, nervousness and worry.

## BEECHAM'S PILLS

are the safest, surest, most convenient and most economical remedy. They clear the system of poisons, purify the blood, relieve suffering and ensure such good health and strength that all the bodily organs work naturally and properly. In actions, feelings and looks, thousands of women have proved that Beecham's Pills

### Make All No Difference.

Sold in bottles of 10 and 25. W. C. Beecham & Co., Ltd., London, England.

### The Advantage

In buying our coffee is becoming better understood all the time, the cause of the additional cups that can be made out of each pound and the in fallible flavor and goodness of the FRESH ROAST.

These coffees are priced from 25c to 50c a pound.

### ROBERT B. MANTELL'S VIEWS ON POSTERITY

A fossil in a museum of a small English town in which Robert B. Mantell was once playing in his youth, is labeled "Mantell, started in uniform, comfortable feeling in the breast of the youthful actor that somebody was poking fun at him. Upon inquiry, however, Mr. Mantell found that the fossil all had only indirect reference to him, self, being from the collection of the famous English geologist, Gideon Mantell, a distant relative of the now distinguished actor, who comes in the opera house, November 12 and 13 in Shakespearean and classic repertoire.

Mr. Mantell, who has little regard for family trees, has never taken the trouble to track out the exact degree

of his relationship to Gideon Mantell, but he knows that a relationship exists. Some of the same sort of blood that flowed in the geologist's veins also courses through the actor's since Mr. Mantell takes a lively interest in rocks and fossils.

Gideon Mantell immortalized himself in the minds of geologists by discovering the great dinosaurian reptiles. During his long life, which extended from 1790 to 1852, the geologist made a splendid collection of fossils. The greater part of which was purchased by the British museum. There is also a Mantellian museum of fossils in Brighton and at other places from the Mantell collection it is to be found in other English museums. Mantell wrote 57 books dealing with various phases of geology, and his "The Wonders of Geology" is a classic. The Mantell collection is still standing.

### CONCERT FOR BEAUMONT HOSPITAL

Princess Tadhana has just returned from Minneapolis, where she sang to the delight of 2,000 persons. Tickets are going rapidly for her concert at the Burns theater, Tuesday, November 11, and the public is urged to secure tickets at Willis auditorium or phone 18-11 hospital and tickets will be delivered.

A concert of such music as will be rendered by this full-blooded Indian girl is a treat that no resident of Colorado Springs can afford to miss. College students, high school and grammar school pupils should avail themselves of this rare opportunity. No lover of good music will fail to be present.

### THEOBALDI CONCERT PARTY

The next number of the Y. M. C. A. concert party, Burns theater, November 14, this company is one of the best that will appear here this fall and winter.

The baldi has been royal chamber musician to his majesty, Oscar king of Sweden and Charles Alexander and Nicholas of Russia. He is now filling engagement in America and will visit the western coast before his return east. He has been given a royal reception wherever he appears.

This is the second number in the

### LOSES GOLD WATCH

While in one of the shower baths of the Young Men's Christian association, Frank Evans, living at 1812 North Tenth street, was robbed of a valuable gold watch yesterday afternoon. Evans left his clothing in the locker room

### SCALY PSORIASIS ON ARMS AND LIMBS

Small Dots Grew Larger. Scales Formed. Looked Horrible. Cuticura Soap and Ointment Cured.

Troop 6th U. S. Cavalry Camp McCoy, Santa Fe. "I was troubled with psoriasis for nearly two years. Portions of my arms and limbs were affected mostly with it. It appeared in small dots breaking out in very small scales and gradually grew larger and white scales formed when about the size of an ordinary match head. The looks of it was horrible which made it very unpleasant for me. It itched a little at times."

I tried several remedies but the trouble seemed to grow worse instead of better and I tried several treatments which cured me for a time but it always broke out again. One day a friend saw the advertisement of Cuticura Soap and Ointment in the paper and I bought a sample. They helped me. I purchased two more boxes of Cuticura Ointment and some Cuticura Soap and they completely cured me. It took three months for Cuticura Soap and Ointment to completely cure me. (Signed) Walter Mayberry, Oct. 22, 1913.

Although the Cuticura Soap and Ointment are most successful in the treatment of affections of the skin scalp hair and hands, they are also most valuable for everyday use in the toilet bath and nursery because they promote and maintain the health of the skin and hair from infancy to age. Sold everywhere. Liberal sample of each mailed free, with 32-p. Skin Book. Add: S. & D. Cuticura Dept. T, Boston.

Men who have and shampoo with Cuticura Soap will find it for the best.

and the watch was removed during his bath. The police are searching for the thief.

### JUDGE W. P. KINNEY SETS COUNTY COURT DOCKET

The docket for the November term of the county court was set yesterday morning by Judge W. P. Kinney. The docket is as follows:

### McManigal in Poor Health? If So, it Is by Overeating

LOS ANGELES, Nov. 4.—The poor health of Orlie E. McManigal, the confessed dynamiter, was the official reason given today by District Attorney John D. Fredericks for ordering what is believed to be the permanent release from the county jail of the untold coworker of the McNamara brothers and chief witness against 33 labor union officials who were sentenced to the federal penitentiary at Leavenworth for complicity in a nationwide dynamite conspiracy.

"McManigal has been in poor health for some time," said Fredericks today, "and he has been taken out of the jail on the advice of a physician."

"Will he be returned when he has recovered?"  
"He may be back in a few days, a few weeks or a few months," was the answer.

"Will he positively return at some time?"  
Mr. Fredericks closed the interview without replying.

According to jail attendants, McManigal's appetite and constantly increasing girth and weight indicated that the condition of his health might have been due to overeating. They said, however, that he had actually gone to a hospital but that it was to have a surgical operation performed to remove from his forehead a great scar, by which he feared friends of McManigal might recognize him.

### LANE FAVORS MT. PARK NEAR DENVER

WASHINGTON, Nov. 4.—Secretary Lane today recommended the withdrawal of more than 34,000 acres of land near the city of Denver, which is planned to convert into a park. The land is picturesque for park purposes. It was reported, but not of value for agricultural mining or other use. The land was withdrawn temporarily during the Taft administration, but reverted to the public domain because of lack of congressional action.

### RAILWAY DEPARTMENT OF A. F. OF L. MEETS IN SEATTLE

SEATTLE, Wash., Nov. 4.—The railway department of the American Federation of Labor met here today to consider the Newlands arbitration bill. The railway men are considering asking the American Federation of Labor which convenes tomorrow, to aid them in obtaining an extension of the provisions of the bill to include railroad shopmen as well as men in the operating department.

### CATARRH SUFFERERS! HERE'S A QUICK CURE! OPENS CLOGGED NOSE AND HEAD AT ONCE

In One Minute Your Stuffy Nose and Head Clears, Sneezing and Mucus Discharging Stops. Dull Ache Goes.

Try Ely's Cream Balm.  
Get a small bottle anyway, just to try it. Apply a little in the nostrils and instantly your clogged nose and stopped-up air passages of the head will open; you will breathe freely, dullness and headache disappear. By morning the catarrh, cold-in-head or catarrhal sore throat will be gone. End such misery now! Get the small bottle of "Ely's Cream Balm" at any drug store. This sweet fragrant balm dissolves by the heat of the nostrils, penetrates and heals the inflamed swollen membrane which lines the nose, head and throat, clears the air, stops a stoppage of mucus and a feeling of cleansing soothing relief comes immediately.  
Don't lay awake tonight struggling for breath, with head stuffed, nostrils closed, hawking and blowing. Catarrh or a cold with its running nose, raw mucous dropping into the throat, raw dryness is distressing, but truly needless.  
Put your faith—just once—in "Ely's Cream Balm," and your cold or catarrh will surely disappear. Adv.

ROBERT B. MANTELL'S CHARACTERIZATION OF MACBETH. AT THE OPERA HOUSE NOV. 12-13.

# VIBRATIONLESS Experience Six-Cylinder Smoothness in Your Four

But This Is the Only Way You Can Get It

**SPEED** your Four up to 30 miles an hour or more on a smooth road. Then throw out the clutch and close the throttle. Or coast down a long smooth hill with the motor running idle.

The feeling is that of flying. There is no vibration. In this particular the sensation of riding in a Four approaches that felt in a Six.

But in a Six, the smoothness is ALWAYS there. You ride like constant coasting. In the HUDSON Six 40, up hill and down, on rough roads or smooth, fast or slow, the feeling is always the same.

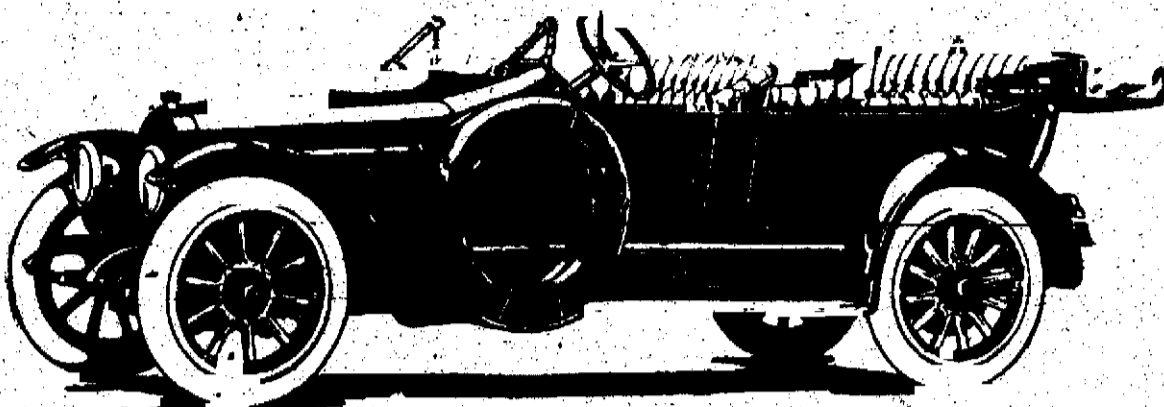

No Four—no matter how powerful or through what combination of gears its power is transmitted—can be made to ride so smoothly.

Come, take a drive in the HUDSON Six 40.

If you enjoy driving, take hold of the wheel and feel for yourself the full meaning of that much-talked-about "smoothness and flexibility of the Six."

See the Triangle on the Radiator

# A NEW HUDSON (Six Passenger) LITTLE SIX--40

Rides Like Constant Coasting

# \$1,750

# FLEXIBILITY Ask Any Six Owner If He Would Go Back to a Four

**IT** WOULD as soon go back to candles after using electric lights. Vibration disappears when you ride in a Six. Rough roads and smooth hills and valleys, ruts and asphalt, are all alike to the six-cylinder motor. Jerks and jabs no longer annoy and fatigue. Bumps are gone. You glide instead of bouncing.

Lasting Value of HUDSON Six 40

Because it is a six-cylinder car, and equipped with the wanted streamline body, the HUDSON Six 40 is a good investment.

It will give you all you can desire of motor satisfaction. And will retain a used car value sufficient to hold your annual motor car outlay at a low figure.

For bear in mind that depreciation in selling value of your car is more important to consider than even tire and gasoline expense.

Remember that a popular, stylish car is easy to turn into money. And that no buyer will pay for a "back number."

**The Distinctive Car of the Year**

The HUDSON Six 40 is the distinctive car of the year.

It is a six-cylinder car, with

Complete Detailed Specifications of the Hudson Six 40

WHEEL BASE, 123 IN. WEIGHT, 2940 POUNDS. LEFT-SIDE DRIVE—RIGHT HAND (CENTER) CONTROL

**MOTOR**  
Cylinders are made of a special grade of tough, close-grained, gray iron, 3 1/2 in. bore by 5 in. stroke. Valves are of nickel steel and interchangeable. They are 1 1/2 in. in diameter, giving 1 1/2 in. clear opening. The valves are operated by extra large and long push rods. The push rod bearings are of new design and are easily removed.

**Pistons** are of special grade gray iron, annealed, ground and lapped in their respective cylinders, with rings in place, thus making a perfect fitting piston.

**Wrist Pins** are of nickel-steel tubing, hardened and ground. They are a press fit in the piston and held in place by a nickel set screw.

**Connecting Rods** are of special steel, 1 1/2 in. beam section, and heat treated to relieve all undue strain.

**Connecting Rod Bearings** are high grade nickel-babbit. This type of bearing has proven very efficient for gasoline motors. **Bearing Caps** are held in place by heat treated nickel steel and castle nuts. Shim of different thicknesses are placed between connecting rod and cap bearings, thus providing an easy adjustment for any wear which may take place.

**Crank Shaft** is of original design, forged from special steel and heat treated. The arms or throws of this shaft are so shaped as to insure perfect balance at all speeds. Bearings are of very liberal size. **Front Bearing** is 2 1/2 in. in diameter by 2 1/2 in. in length. **Middle Bearing** is 2 1/2 in. in diameter by 2 1/2 in. in length. **Rear Bearing** is 2 1/2 in. in diameter by 2 1/2 in. in length. **Connecting Rod Bearings** are 1 1/2 in. in diameter by 2 1/2 in. in length.

**Crank Case** is of aluminum. The upper half carries the three crank shaft bearings so that should it be necessary, the lower half of the case

can be removed without disturbing the crankshaft. The lower half of the case, which is a steel stamping, contains the oil reservoir.

The **Crankshaft** is made of special steel hardened and ground. Cranks are integral with the shaft, which is of extra large diameter and runs on three nickel-babbit bearings of the following sizes: Rear end 1 1/2 in. in diameter by 1 1/2 in. in length, middle 2 1/2 in. in diameter by 1 1/2 in. in length, front end next to gear 2 1/2 in. in diameter by 1 1/2 in. in length.

**Timing Gears** are of special steel, heat treated. Gears are of helical type, which has been proven to be the most satisfactory for this purpose.

**Water Pump** is of centrifugal type and of such size as to provide ample circulation of water. Pump is mounted in large semi-circular bearings, which makes it easy to assemble and at the same time assures perfect alignment with the driving shaft. The stuffing boxes can be easily repaired without removing the pump.

**Fan** is a six-bladed belt-driven fan mounted on a pivoted bracket on the motor.

**Lubrication**—Motor is lubricated by constant level splash system, with reservoir beneath the crank case.

**Oil Reservoir** is exposed for the purpose of cooling the oil, insuring better lubrication and considerably increased mileage per gallon of lubricating oil.

**Oil Level Gauge** is provided on the left side of the oil pan, for the purpose of determining at all times the amount of oil in the reservoir. An oil filler is located on the left side of the crank case. A **Pressure Gauge**, located on the coil apron and marked "Oil Pressure" indicates that the oil is circulating.

**Carburetor**—The motor is equipped

with carburetor of improved type, adjustment being provided for low speed. One adjustable Control Valve attached to carburetor to Hot and Cold Air, also Strangler. This valve is operated by one lever on the coil apron within easy reach of the driver.

**IGNITION, STARTING AND LIGHTING.**  
**Ignition**—Delco system. Dual ignition, that is, two systems of the magneto type for ordinary running, and another, with the dry batteries, used in case of emergency.

**Starting**—The motor is positively started by the Delco Electric Motor, thereby doing away with the necessity of the starting crank. The Starter is operated by pushing a small foot pedal located on the left side of the gear shift lever in the center of the car.

**Lighting**—All lamps are lighted directly from the generator and when the motor is not running the current is supplied by the storage battery. A small lamp is located on the coil apron above the instruments for the purpose of illuminating them at night. All lights are operated by switch located on the coil apron.

**CLUTCH**  
**Clutch**—After years of continuous use, under all conditions, we believe we can safely claim our clutch to be the most nearly perfect in use. It is of an improved noiseless disc type, self-contained in an oil-tight case, which is a part of the flywheel. All discs are made of steel stamping, the driving disc having cork inserts.

**TRANSMISSION**  
Transmission is of the selective type; three speeds forward and reverse with direct drive on third speed. Transmission is bolted to the rear of motor, making a unit

power plant. This construction assures perfect alignment between crankshaft, clutch and transmission shaft. This case is designed in such a manner that all parts may be easily reached without the use of special tools. Large size roller bearings are used throughout. A large try-on is provided on the side of the case to determine proper oil level. Filler plug is also provided in the top of transmission for adding lubricant from time to time.

**DRIVING SHAFT**  
Power is transmitted from the transmission to rear axle through a tapered Propeller Shaft and two universal joints. The shaft is of a special steel and heat treated.

The **Universal Joints** are extremely strong to withstand all hard work imposed upon them. They are made of special steel, hardened and ground.

**FRONT AXLE**  
The Front Axle is a one-piece, drop forging of special steel, heat treated. The section of the beam at the smallest point measures 2 1/2 in. high by 1 1/2 in. deep, making an extremely strong axle which can withstand both the horizontal and vertical strains to which it is continuously subjected. This axle is known as the inverted Lemniscate type. Vertical spindles are of large diameter and mounted in phosphor bronze bearings. Extremely large phosphor bronze thrust surfaces are provided at the bottom for the purpose of carrying the load and making easy steering adjustment being provided should any wear occur on the thrust surfaces. The wheel spindles are of nickel steel of large dimensions, being heat treated and ground at point where bearings are fitted.

Speedometer drive is effected by shaft through center of wheel spindle, terminating at the inner end in

a pair of spiral gears, at which point proper connection is provided for the attachment of the speedometer shaft. The outer end is driven by steel stamping, located in hub cap. This absolutely eliminates noisy speedometer drive gears, and the difficulty experienced with such gears when exposed.

**REAR AXLE**  
Rear Axle is of pressed steel, full floating type, which is lighter and stronger than the ordinary type of tubing axle. The driving gears and differential are mounted as one unit, which is bolted to the axle and easily removed without taking the axle out from under the car. The construction of this unit is such as to allow of adjustment of the pinion and driving gears without interfering with other parts. The adjustment of the pinion in no way affects the bearing adjustment.

**Pinion and Differential Case** are mounted on large roller thrust bearings and the whole run continuously in a bath of oil.

The **Driving Shafts** are made of nickel steel, oil-treated, and can be removed without disturbing any other parts of the axle. They drive the wheels through the flanges bolted to the wheels.

**Driving Pinion and Crown Gear** are made of nickel steel, properly heat treated and hardened. A large removable plate is provided on the back of the axle housing which allows inspection, cleaning or adjustment of the differential when necessary. Each end of the axle carries two roller bearings, upon which wheels are mounted. The entire load of the car is carried on the axle housing and not by driving shaft.

Specialty constructed suspension springs are provided for the purpose of driving the car. Also for taking the torque. This makes an

exceptionally flexible combination and is extremely desirable for light cars. This construction is similar to that adopted by a number of foreign makers.

**HUBS**  
Front Hubs are made of best grade of malleable iron obtainable and are securely clamped to wood work of wheels. **Rear Hubs** are made of steel stampings.

**BRAKES**  
Brakes are of the equalizing type. The Foot Brake is of external contracting type and the Emergency Brake is of the internal expanding type. The brakes are 14 in. in diameter by 2 1/2 in. face. The Brake Drum is a one-piece steel stamping, bolted directly to the wheel spokes by means of six bolts.

**WHEELS**  
Wheels are of the Artillery type. Ten spokes are used in the front wheels with 10 hub-lamping bolts. Twelve spokes are used in the rear wheels, with 8 hub-lamping bolts. Wheels are fitted with 3 1/2 in. diameter rim which take straight-side tire.

**FRAME**  
The Frame is of special grade pressed steel, heat treated. It is of extra heavy channel, having a section 5 in. high, and 2 1/2 in. wide. All **Cross Members** are also of pressed, heat-treated steel, hot riveted to side members.

**SPRINGS**  
Springs are of semi-elliptic type in the front and three-quarter elliptic in the rear and are very flexible. **Front Springs** are 2 in. wide by 39 in. long. **Rear Springs** are 2 in. wide by 54 in. long. Springs are assembled with graphite grease between the leaves, to lessen friction and prevent squeaking and wear. All **Spring Eyes** are equipped with phosphor bronze bushings. **Suspension bolts** are of high grade steel, hardened and ground. Each bolt is provided with a secure cup by means of which lubricant is easily fed to the bronze bushings.

**STEERING GEAR**  
Steering Gear is of the worm and gear construction. Worm gear and shaft are made in one piece from a special hardened steel. The worm gear is a full type gear and not a sector, as is the practice in many steering gears on other cars.

**Control Levers** are placed upon top of the steering column.

**STEERING WHEEL** is highly polished walnut, 16 in. in diameter.

**GASOLINE TANK**  
Gasoline Tank is placed under the coil with the filler in a very accessible position on the coil arm. The tank is rigidly constructed with two partitions to prevent the gasoline from splashing sideways. The tank is tested under pressure to make sure that there is no leakage. Capacity of the tank is 13 gallons. **Accurate Sight Gauge**, conveniently located on dash, shows level of gasoline in tank. At a convenient point at the bottom of the tank, a **Sediment Cup** is provided for the purpose of catching all foreign matter which would otherwise find its way to the carburetor. The sediment cup is provided also with a **Shut-off Cock** in the carburetor operated by rod located in convenient position under the tank.

**RADIATOR**  
Radiator is of the genuine honey-comb type of large cooling capacity. A **Drain Valve** is provided in the lower front part of the radiator for draining the water when necessary.

**TRUNK RACK**  
Trunk Rack of latest type is furnished as regular equipment on Phaeton Six 40. The rack will accommodate a trunk 28 in. long, 16 in. wide and 13 in. high.

# THE DAY'S HAPPENINGS IN SPORT CIRCLES

Edited for THE GAZETTE by T. W. Ross

## WHITE TAKES SHOT COLORADO GAME LAWS

Stewart Smith, widely known as a contributor to sporting magazines under the pen name of "Bob White," attention to what he believes an unwise "Colorado Springs" man who goes out for a day's hunt and who has ordered off a "beast" of the kind. He also gives his views on the decision to be made in the case of a white protecting quail, as follows:

A few weeks ago 11 hunters were out for a day's hunt near Huerfano, and one of them, a white, was unlucky enough to have found in his possession by the warden, or a deputy. That speaks for the warden, as it shows that a white is more than a knot of hair on a man's head. About a month ago, a white and a search for a white, and a dozen others who were with the same law of our state very good still they could be bet-

tered. For instance, there is the closed season on quail, but I wish to ask every fair-minded sportsman what good it will do him, have them protected, when, as it now is, they are only half cared for. The quail will have no show at all to survive a hard winter, as when a hard storm or blizzard comes up, and there is no open ground on account of the deep snow, they have no chance to feed, and the are easily overcome by extreme cold, or fall a prey to coyotes.

"In the east," when there is a heavy snow storm, the hunters go out in the worst kind of weather, with nets, and catch "half-frozen" quail and keep them in their barns until warm weather, when they are liberated. I have none less than one occasion, and if some of our overzealous game wardens and so-called sportsmen would do as I have done, there would be more quail. But it seems that there are a great many who prefer to stick around the sporting goods stores, telling what they know about game and game laws, when they should be out gathering in the half starved, half frozen quail on at least scatter grain around where they are known to feed.

"Besides the quail protection failure, there is another subject which I wish

to put before Gazette readers. On Sunday, three others and myself were ordered from the Charter Oak ranch for the reason, as I was informed, that it was for the use of only a favored few, because of course, to men who can afford to pay for their hunting. There are many such instances where land is leased in this manner, and the "common" man has very little chance to get away for a little hunting trip, unless they come face to face with the many "No trespassing" under penalty of the law signs. These signs are invariably put up by men higher up, who have the money to go where the poor man cannot. And when a person approaches one of these men who have a lease on such posted land to get permission to hunt, invariably a case of every man for himself, and the devil take care of the hindmost.

In New Jersey there is no such thing as "No trespassing" in place of them are found signs as on my father's farm. Every body is welcome, but don't shoot my chickens.

The Miller-Dixon Colts of Pueblo will lead the Colorado Game tonight at a track on the Colorado river. The match is one of a series of the played between the two clubs.

## CAMP OUTFIGHTS CHAVEZ IN 20 ROUNDS ON COAST

**San Francisco Lad Severely Punished**  
Trinidad Lightweight Through Sixteen Fierce Rounds.

**LOS ANGELES**, Nov. 4.—Eddie Camp of San Francisco was given the decision over George Chavez of Trinidad in a fast round in a draw in a ten-round fight. Chavez, of Trinidad, was knocked out in the second round of the semi-final.

**ALBUQUERQUE**, N. M., Nov. 4.—In a fast round for the title of champion of the world, Chavez, of Trinidad, was knocked out in the second round of the semi-final.

**ALBUQUERQUE**, N. M., Nov. 4.—In a fast round for the title of champion of the world, Chavez, of Trinidad, was knocked out in the second round of the semi-final.

## DAVIS WINS RACE ACROSS DESERT IN RECORD TIME

**PHOENIX**, Ariz., Nov. 4.—John Davis, the youthful San Diegoan, won with a big Locomobile today the sixth annual Los Angeles to Phoenix road race of 574 miles. Davis' time officially was 18 hours and 50 minutes, an average of 30 miles an hour, or two miles an hour better than the former record across the desert.

The 1913 full road second place with a Marmon, with a running time of 21:15, from Los Angeles. The third car was Louis Nikrent's Buick, 21 hours and 58 minutes out of Los Angeles.

**PHOENIX**, Ariz., Nov. 4.—Velle car No. 6, driven by Noyce, covered the 215 miles from El Paso to the night control here of the El Paso-Phoenix race in the fastest time, 8 hours, 12 minutes and 55 seconds.

Back No. 3, driven by Hutchins, was second, with a running time of 8 hours and 19 minutes and 22 seconds.

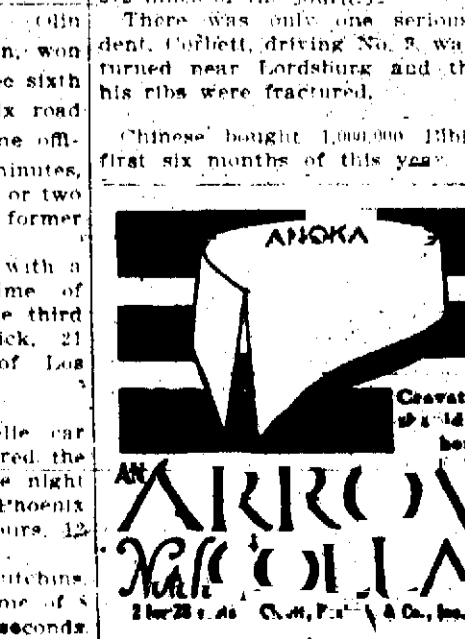

## STUTZ NO. 2, JOHNSON DRIVER, WAS THIRD 8 HOURS, 50 MINUTES, 38 SECONDS

All but seven of the 19 cars that started from El Paso reported into control before midnight, and will start at 5:30 tomorrow on the remaining 372 miles of the journey.

There was only one serious accident, which, driving No. 2, was overturned near Lordsburg and three of his ribs were fractured.

"Chinese" bought 100,000 Bibles the first six months of this year.
